DETAILED ACTION

Response to Amendment

The Amendment, filed on April 22, 2009, has been entered and acknowledged by the Examiner.

Cancellation of claims 1-11 has been entered.

Claims 12-28 are pending in the instant application.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

In the title,

The title has been replaced in its entirety with the following text:

--SPARK PLUG WITH EXCELLENT IMPACT RESISTANCE CONDUCTIVE
SEAL, AND METHOD FOR PRODUCING THE SAME--

Allowable Subject Matter

Claims 12-28 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 12, the references of Prior Art of record fails to teach or suggest the combination of the limitations as set fourth in claim 12, and specifically comprising the limitation of "wherein said electrically conductive sealing layer is made of electrically

Art Unit: 2879

conductive glass containing a glass component and a metal component, the metal component being in an amount larger than 30 mass% and smaller than 75 mass% of the electrically conductive glass, and the metal component comprising Cu-Zn alloy in an amount of larger than 10 mass% of the metal component”, in combination with the remaining limitations.

Regarding claim 13, claim 13 is allowable for the reasons given in claim 12 because of their dependency status from claim 12.

Regarding claim 14, the references of Prior Art of record fails to teach or suggest the combination of the limitations as set fourth in claim 14, and specifically comprising the limitation of “wherein said electrically conductive sealing layer is made of electrically conductive glass containing a glass component and a metal component, and the metal component comprises Cu-Zn alloy in an amount of larger than 50 mass% of the metal component”, in combination with the remaining limitations.

Regarding claim 15, claim 15 is allowable for the reasons given in claim 14 because of their dependency status from claim 14.

Regarding claim 16, the references of Prior Art of record fails to teach or suggest the combination of the limitations as set fourth in claim 16, and specifically comprising the limitation of “filling said through-hole of said insulator with electrically conductive glass powder containing glass powder and metal powder, the metal powder containing Cu-Zn alloy powder in an amount of larger than 10 mass% of the metal powder; and softening said electrically conductive glass powder to form said electrically conductive sealing layer, wherein said electrically conductive glass powder contains said metal

powder in an amount larger than 30 mass% and smaller than 75 mass% of the electrically conductive glass powder”, in combination with the remaining limitations.

Regarding claims 17-21, claims 17-21 are allowable for the reasons given in claim 16 because of their dependency status from claim 16.

Regarding claim 23, the references of Prior Art of record fails to teach or suggest the combination of the limitations as set fourth in claim 23, and specifically comprising the limitation of “filling said through-hole of said insulator with electrically conductive glass powder containing glass powder and metal powder, the metal powder containing Cu-Zn alloy powder in an amount of larger than 50 mass% of the metal powder; and softening said electrically conductive glass powder to form said electrically conductive sealing layer”, in combination with the remaining limitations.

Regarding claims 24-28, claims 24-28 are allowable for the reasons given in claim 23 because of their dependency status from claim 23.

Yoshida, which is closest prior art of the record, discloses the claimed method for producing a spark plug of the invention of the instant application. However, Yoshida discloses on col. 4, lines 22-25 that the alloy must not exceed 30wt%, therefore Yoshida does not disclose the limitations of claims 12, 14, 16 or 23. This limitation has not been found, taught, or suggested by the prior art of the record which it makes these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2879

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
